THE SPEAKERS THAT SHOOK THE ESTABLISHMENT

Rectilinear SUPER SPEAKERS

Rectilinear-III FOUR-WAY SPEAKER SYSTEM

As Reviewed in Popular Science: "Their Model IIIs are the finest loudspeakers I've ever listened to, regardless of size, type, or price." As seen in HIFI STEREO REVIEW. "Our side-by-side comparison with a full-range electrostatic speaker (Quad), which we consider to be one of the finest reproducers available, proved to our satisfaction that the two could not be told apart except in the low bass, where the Rectilinear III was clearly superior. The Rectilinear III can be driven by any amplifier capable of 20 watts output, which includes practically all integrated receivers, yet can handle the output of the largest amplifiers'.
